Jan. 11 - Jan. 24

1 Progress

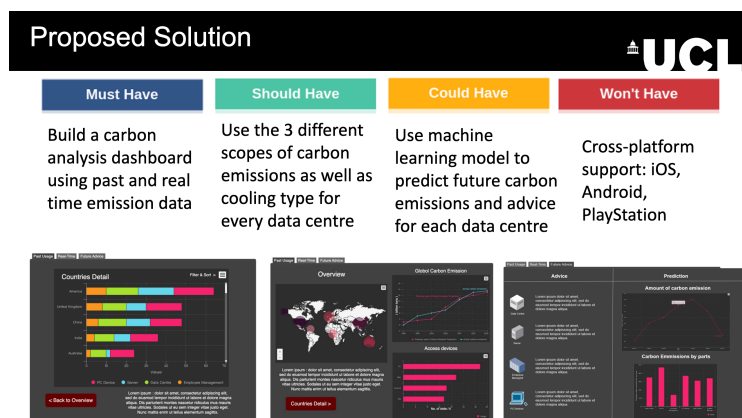

1.1 Elevator Pitch

During these two weeks we have been working on our elevator pitch. Through this short presentation we hope to illustrate our process to our mentors, clients and peers.

We started by explaining the user's need for a dashboard to centralise all carbon emissions data,

followed by the types of data that our dashboard would provide,

finally we mentioned the progress of the project so far, including the technology stack and algorithms used.
